### Reference equations

$$N_{SM} = N_g + N_{other} = 47 + 19 = 66$$

$$h_{ij}(x) = \sum_{k,s} q_{ks} e_{ij}^s(k) e^{ikx}$$

$$[q_{ks}, p_{k's'}] = i\hbar \delta_{kk'} \delta_{ss'}$$

### Use in this course

Use the notation and normalization conventions in the weekly lecture notes. State the data version whenever a numerical value is quoted.
